CIRCULAR. The attention of Town Superintendents.

Teachers, and others interested in the cause of popular education in the State of Vermont is called to Section 2, Act No. 2, of the Laws o Vermont for the year 1866, which reads as fol-Section 2 .- The Board of Education are hereby authorized and it is made their duty, or or before Ju'y 1, 1867, and on or before said data every lifth year thereafter, to searct a list of such grammars, geographies, aritametics, interiors of this State and the United States, pink osophies, algebras, readers and speders, not exceeding one book of a kind in each branen, as

they shan deem best smited for instruction and use in the district schools in this state, in each of said branches; and shall cause the list so acheeted to be published in all the news, apers published in the State, during the month of January next following the making of such setection; and a so to be inserted in each senor register issued after one year from the makin of such selection; which list, so selected, shall be and remain authoritative and inding upon the Board of Education, superintendents and teachers, and during five years from and after ovember 1, 1868, and each live years thereat ter; and superintendents and teachers shall recommend for use in the district schools, as new books shall become necessary for instruction in the branches named, no other than the books included in said list so selected and pub-

lished. The following is an extract from the Report of the Board of Education, for the year 1867,

page 8: Mitchell's First Lessons, Primary, and Intermediate Geographies were adopted, for these reasons, in brief; the simplicity and elearness of the text, the gradual and constant advancement from the primary truths to the higher departments o geographical anowledge, the con-ciseness and completeness of the definition, the degance and accuracy of the maps, the at-tractiveness of the petornal illustrations, and the uniform method of treating topics that ar-similar to each other. Since the adoption of these books, the publishers have taken measures to prepare a spec a edition of the Interm diate Geography for use in the schools of V. mont. This edition wid contain a new map of the State, engraved on copperpate; and map of the State, engraved on copperpate; and our pages of actier press and questions, relating to the geography of Vermont to be prepared by Lev Piny H. White, it is believed that this feature, while it is not to increase the cost of the booss, will mate ruly increase its vaine and the interest with which it will be studied. McNaily's Physical Geography, accompanied by Monteith's Lessons in Astronomy, was adopted to be used in those departments of the sindy which are indicated by their titles. Guyors common school Geography was adopted as a rhysical Ocography of a grade different from accounty.

Inasmuch as there seems to be some misaprehension as to the intention and design of the Board in recommending the different text-books in geography, it seems proper to state that it was their intention to recommend the use of sitchel,'s Geographies by all classes which have hitherto used, or which would otherwise use Cornell's, and that they did not design that unyot's Geographica should be used, except by pupi s who, having passed through Mitchel's desire to advance to tue study of physical geo kral by by Guyot's method.
